SINCE 2015

WHO WE ARE

Dryft Dynamics offers unparalleled services viz., Consultancy, Technology, and Outsourcing in the highly competitive Indian IT industry. We deal in website development, website audit, cyber security, business and enterprise software, GPON services, network & servers, App development, Project management system development (CRM, Social media marketing tool, etc) and cloud-based services. Our competent team of 33 IT professionals design, customize as well as optimize your products to best match the current technology standards. We create opportunities that fuel transformation for businesses and enable them to seize the opportunities of the application economy.

SOFTWARE IS AT THE HEART OF EVERY BUSINESS, IN EVERY INDUSTRY.

WHAT WE DO

- **WEBSITE DEVELOPMENT & AUDIT**
- **APPLICATION DEVELOPMENT**
- **CUSTOMISED SOFTWARE DEVELOPMENT**
- **ON-SHELF SOFTWARE (PRODUCTS)**
- **ERP & CRM DEVELOPMENT**
- **CLOUD SERVICES**
- **CYBER SECURITY**
- **GPON & NETWORKING**

From planning to development to management and security, Dryft Dynamics is working with businesses worldwide to change the way we live, transact and communicate. Our software and solutions help our customers drive enterprise-wide productivity, offer differentiated user experiences, and open new growth opportunities. And we are able to deliver this value across multiple environments mobile, private and public cloud, distributed, and mainframe. Our goal is to be recognized by our customers as their critical partners in the new application economy. While we pride our eye on detail in constructing robust contracts with clients, we realize that relationship beyond the contract what will change tomorrow.

CONNECT ONLINE

ENDELPIS™

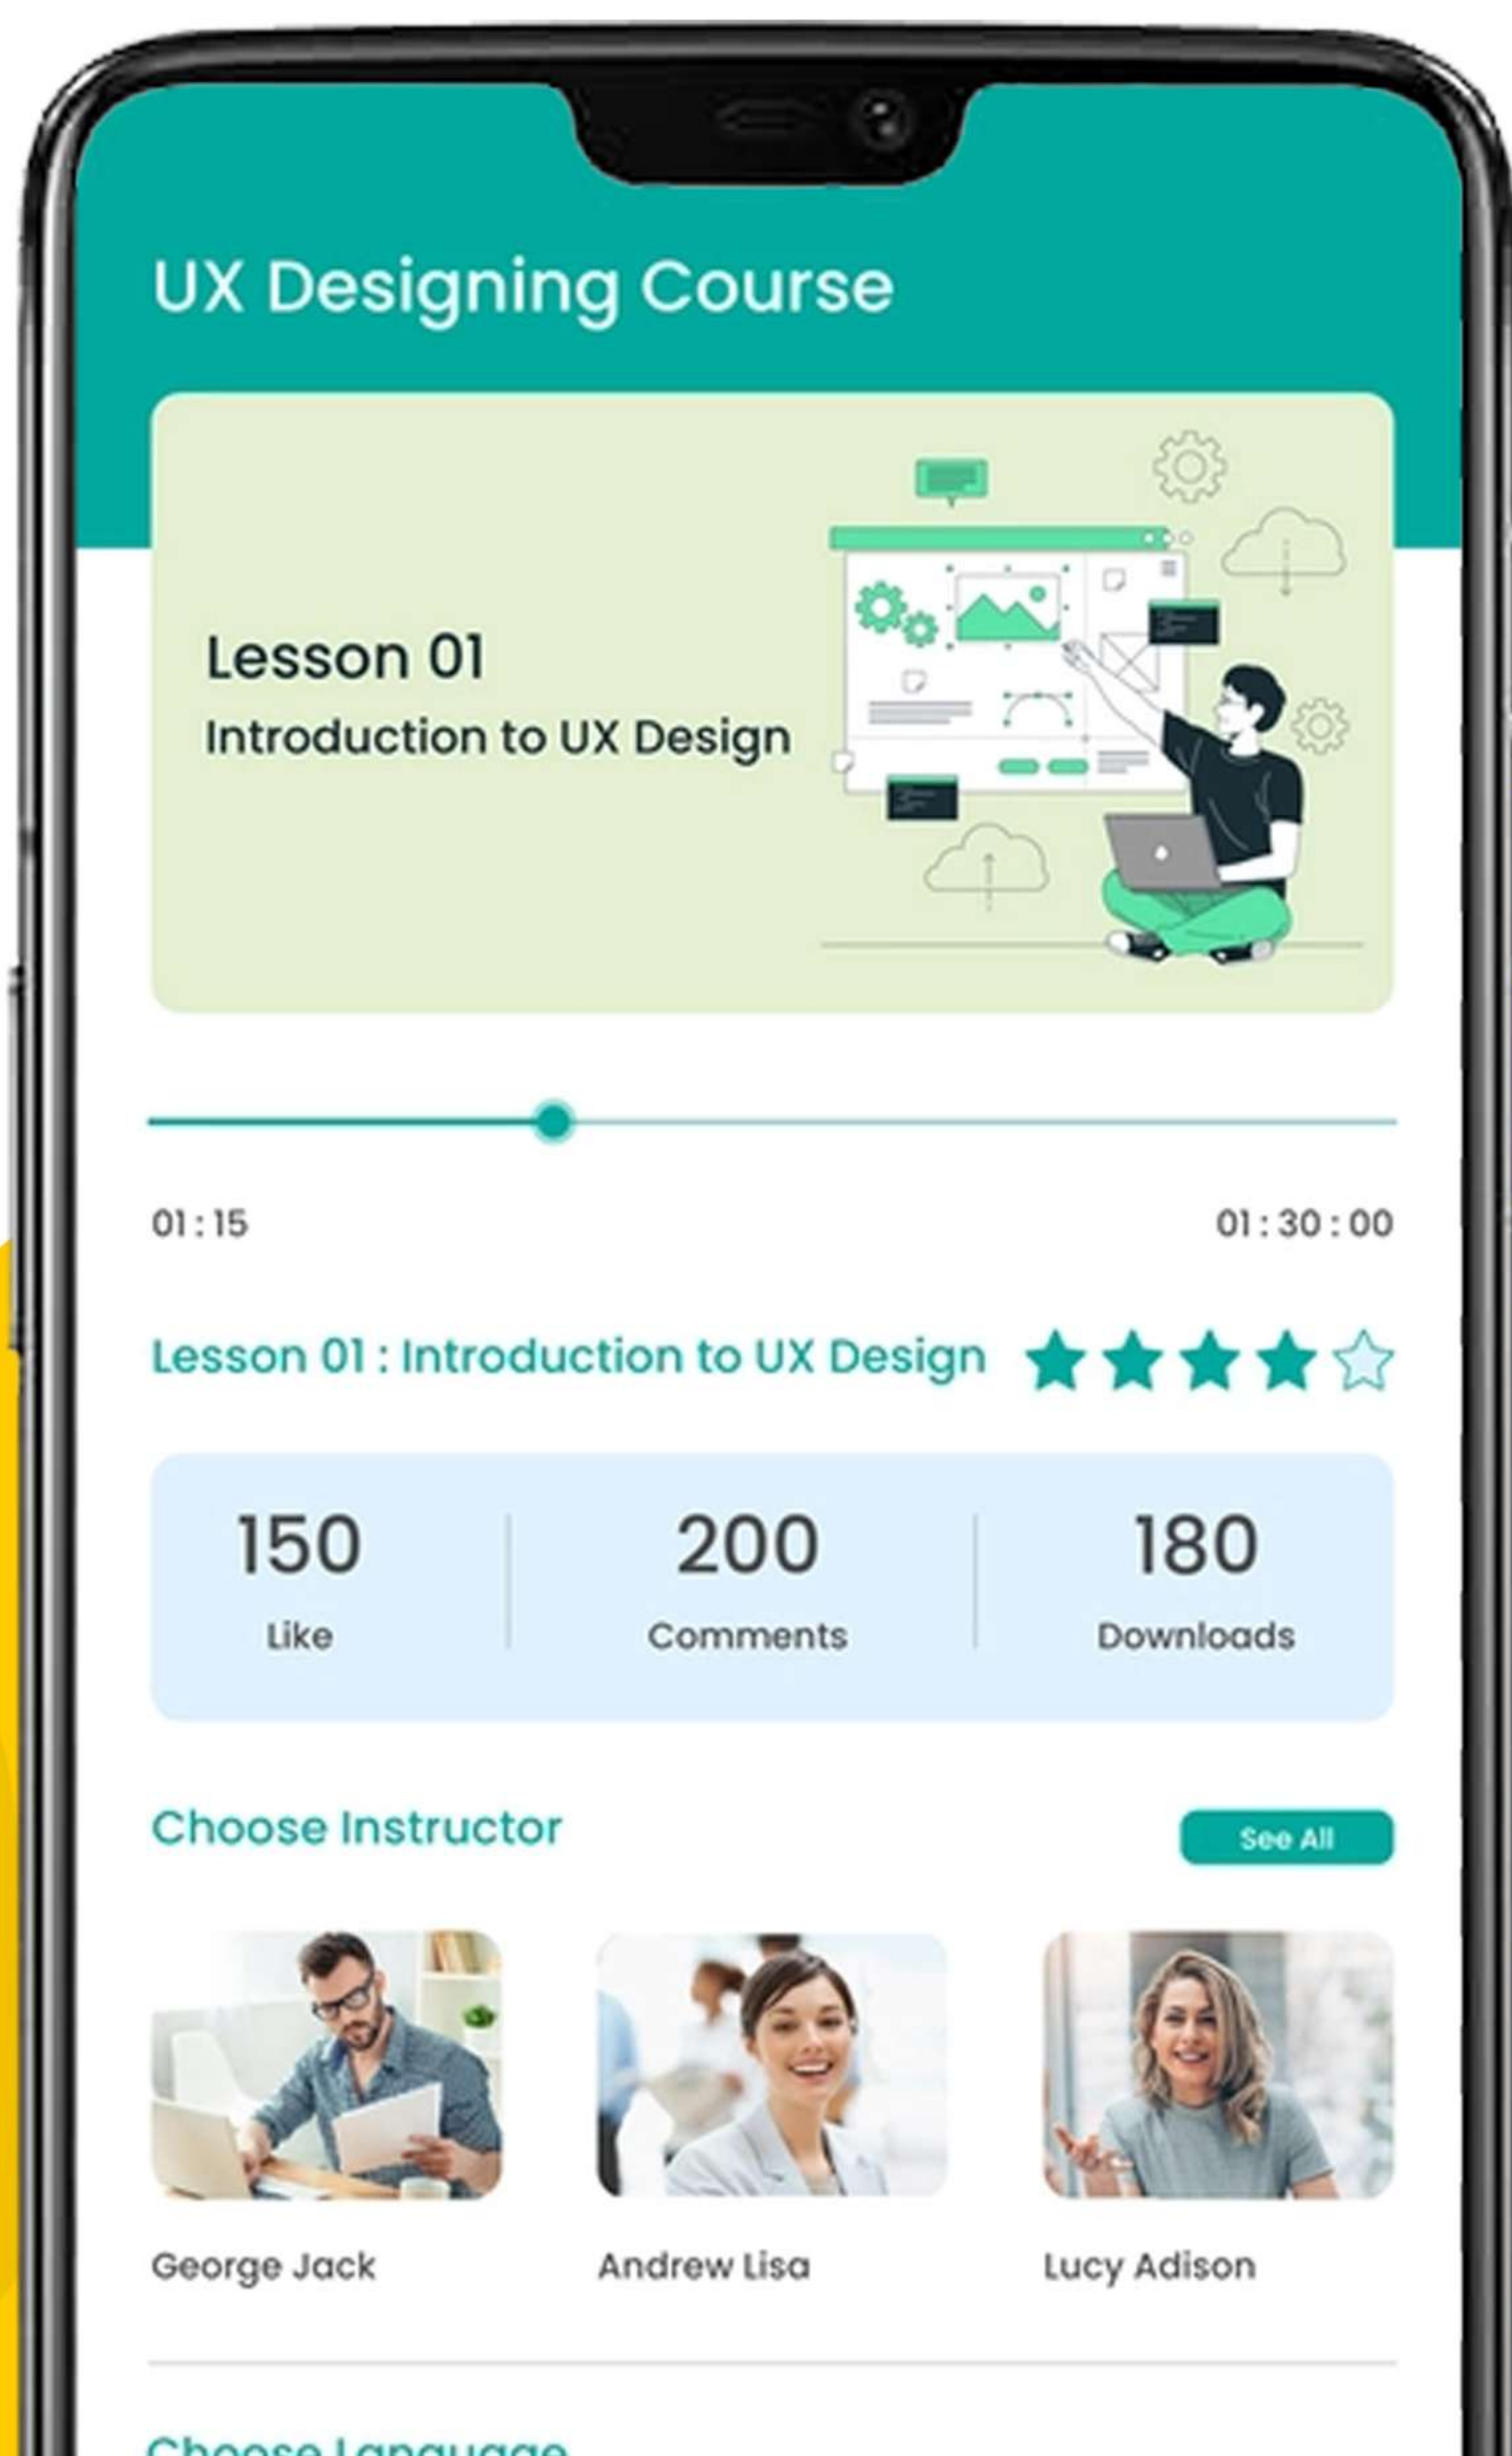

Endelpis is a robust and user-friendly school management software that provides comprehensive solutions for student information management, attendance tracking, academic management, communication, and administrative tasks. By leveraging these features, educational institutions can enhance their operations, improve communication channels, and effectively manage their administrative tasks, leading to better student outcomes and overall institutional efficiency.

EDYFY™

Edyfy, a learning management system (LMS) is an online platform that facilitates the administration, delivery, and tracking of educational courses and training programs. It provides tools for creating, organizing, & distributing learning materials, as well as features for student enrollment, assessment, & communication. Edyfy LMS allows learners to access resources, participate in discussions, submit assignments, and receive feedback remotely. It also enables instructors to monitor progress, grade assignments, & generate reports. With its centralized approach, Edyfy LMS streamlines learning processes, enhances collaboration, and promotes self-paced & blended learning, making it an effective tool for educational institutions, businesses, & organizations worldwide.

- **LEARNING MANAGEMENT**
- **EASY CUSTOMIZATION**
- **FLAWLESS UI / UX**
- **ADD MULTIPLE COURSES**
- **MULTIPLE PAYMENT MODE**
- **FEATURE RICH DASHBOARD**
- **MULTIPLE INSTRUCTORS**
- **SUPPORTS LTR AND RTL**
- **ADD VIDEO, IMAGE, ETC**

Available on

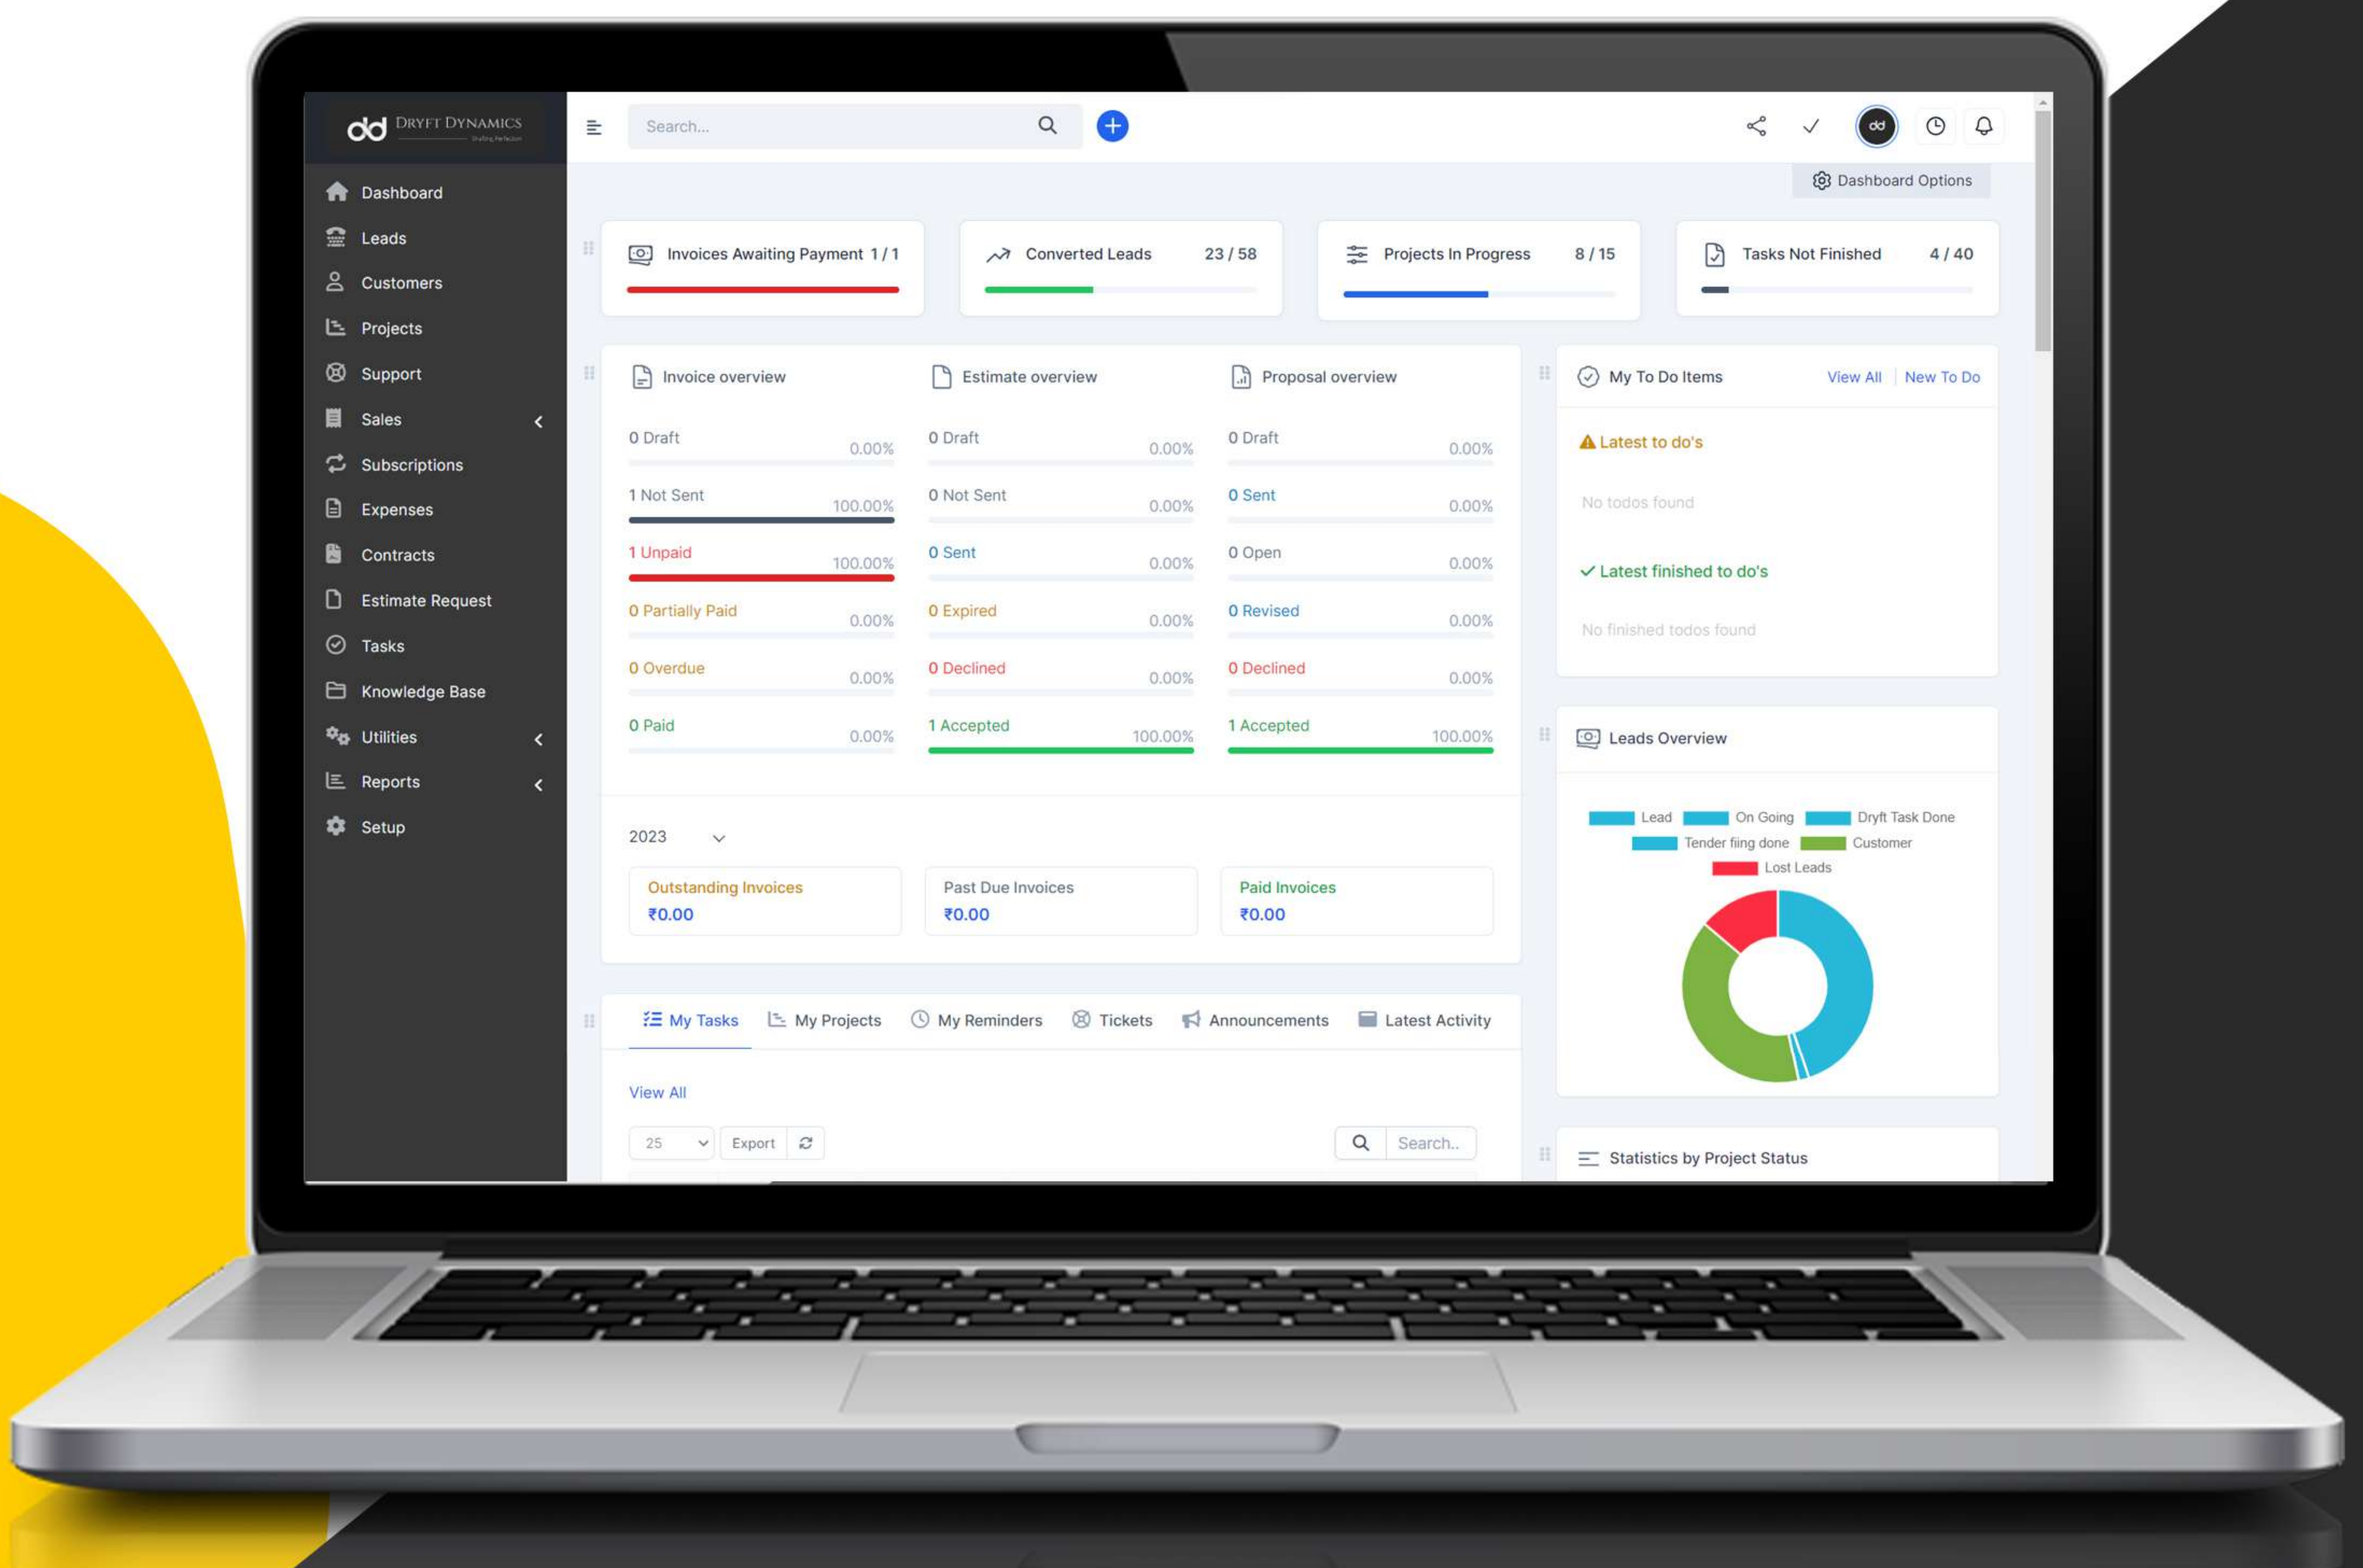

BUZZIT™

BuzzIt is a software platform that assists individuals and businesses in effectively managing their social media presence. It provides a centralized dashboard where users can schedule, publish, and monitor content across multiple social media platforms, such as Facebook, Twitter, Instagram, LinkedIn, etc. The tools offer features like content scheduling, social media listening, analytics, and team collaboration. BuzzIt has been widely used by various organizations with multiple social media platforms.

KWORTON™

kWorton is an ERP-CRM hybrid or integrated ERP-CRM software. It integrates the functionalities of ERP and CRM systems into a unified platform, enabling businesses to manage both internal operations and customer interactions seamlessly. It provides features for core business processes like finance, supply chain management, inventory control, and human resources (ERP), while also incorporating customer-centric functionalities such as sales management, customer service, marketing automation, and contact management (CRM). By combining these two systems, the software enables businesses to streamline operations, improve customer engagement, enhance data visibility, and facilitate a holistic view of their business processes and customer interactions.
